SUMMARY

Highly motivated and results-oriented software engineer with a strong academic background and proven experience in software development and a proven track record of success in designing, developing, and implementing software systems. Seeking a challenging role where I can leverage my skills in Java and Python, database fundamentals, AWS, and container technologies (Docker, Kubernetes) to contribute to a dynamic team and actively participate in Agile methodologies. Eager to apply expertise in troubleshooting complex defects and mentoring junior team members.

EDUCATION

University of California, Berkeley	**None**
Master of Science in Computer Science	*2020-2022*
Stanford University	**None**
Bachelor of Science in Computer Science	*2016-2020*

EXPERIENCE

Google	**None**
Software Engineer Intern	*Summer 2021*
Stanford Artificial Intelligence Lab	**None**
Research Assistant	*2019-2020*

PROJECTS

Enhanced E-commerce Platform *None*
- Improved transaction speed by 20%
- Reduced server costs by 15%
- Implemented robust security measures
- Utilized AWS, Docker, and Kubernetes

Microservice Architecture for Inventory Management *None*
- Improved scalability and maintainability
- Reduced downtime by 10%
- Implemented CI/CD pipeline using Jenkins and Git

ACTIVITIES AND AND AND LEADERSHIP

None	**None**
None	**None**

SKILLS

programming_languages: ['Java', 'Python', 'C++', 'JavaScript', 'Swift']
technologies: ['React', 'Node.js', 'MongoDB', 'AWS', 'Azure', 'Spring Boot', 'MySQL', 'PostgreSQL', 'Flask']
tools: ['Git', 'Docker', 'Kubernetes', 'Jenkins']
other: ['Machine Learning', 'Data Structures and Algorithms', 'Problem Solving', 'Teamwork', 'Agile Methodologies', 'SQL', 'Database Design']
