SUMMARY

Highly motivated and results-oriented software engineer with a proven track record in designing, developing, and deploying robust software applications. Seeking a challenging role at Fortra where I can leverage my expertise in Java/Python development, Agile methodologies, and cloud technologies to contribute to innovative product development and team mentorship.

EDUCATION

university   **chapel hill, nc**
MS   *Aug 2023 - may 2025*

- bitch
- work
- done

smol   **cisdf, dshfsd**

PROJECTS

High-Availability Microservice Architecture for E-commerce Platform   *June 2022 - December 2022*

- Migrated a monolithic e-commerce application to a microservice architecture using Spring Boot and Kubernetes, resulting in a 30% reduction in application latency and a 15% increase in overall system throughput.
- Implemented a robust CI/CD pipeline using Jenkins and Docker, automating the deployment process and reducing deployment time by 75%.

Intelligent Anomaly Detection System for Network Security   *January 2023 - May 2023*

- Developed a machine learning-based anomaly detection system using Python and scikit-learn to identify and flag suspicious network activities, achieving 95% accuracy in detecting malicious intrusions.
- Integrated the system with existing security infrastructure, providing real-time alerts and improving incident response times by 40%.

Scalable Data Pipeline for Real-time Data Analytics   *June 2023 - October 2023*

- Designed and implemented a highly scalable data pipeline using Apache Kafka and Spark to process and analyze large volumes of real-time data, improving data processing speed by 60%.
- Developed a user-friendly dashboard using React to visualize key performance indicators (KPIs), providing actionable insights to business stakeholders.

SKILLS

Languages: ['Java', 'Python', 'SQL']
Frameworks: ['Spring Boot (Java)', 'Django/Flask (Python)', 'React']
Databases: ['PostgreSQL', 'MySQL', 'MongoDB']
Cloud: ['AWS (EC2, S3, Lambda)', 'Docker', 'Kubernetes', 'Helm']
Operating Systems: ['Linux', 'macOS']
Methodologies: ['Agile (Scrum, Kanban)', 'Waterfall']
Tools: ['Git', 'Jira', 'Jenkins']
