Hiring Manager
NTT DATA North America

Subject: Application for Full Stack Developer

Dear Hiring Manager,

I am writing to express my keen interest in the Full Stack Developer position at NTT DATA North America, as advertised on Lensa. NTT DATA's commitment to innovative healthcare solutions and its impact on communities deeply resonates with my professional goals. My experience in developing scalable, cloud-native applications, particularly within the healthcare sector, aligns perfectly with the requirements outlined in the job description.

My background encompasses full-stack development using Java/Spring Boot and React, complemented by expertise in microservices architecture and NoSQL databases like MongoDB. Throughout my career at Cognizant Technology Solutions, and in my personal projects, I have consistently demonstrated the ability to translate complex business requirements into high-quality, maintainable code. For example, during my role as a Software Developer, I improved API response times by 15% by developing and deploying full-stack features using Spring Boot and React. Furthermore, my experience as a Programmer Analyst Intern saw me reduce reported issues by 10% through proactive bug fixing and enhanced test automation.

My personal projects further solidify my capabilities. The Cloud-Native Healthcare Platform, developed using Spring Boot and React, improved data access across applications by 20%, showcasing my proficiency in microservices architecture and scalable application design. The React-based Patient Portal, which I designed and developed, resulted in a 25% improvement in patient engagement metrics, highlighting my ability to create user-friendly and impactful applications. Finally, the Microservice for Secure Data Exchange, built using Spring Boot, ensured HIPAA compliance and improved system troubleshooting efficiency by 20%, demonstrating my commitment to secure and robust software development. These projects directly demonstrate my experience with Java, Spring Boot, React, Microservices Architecture, and MongoDB, all key requirements highlighted in the job description.

My resume provides further details on my qualifications and achievements. I am confident that my skills and experience make me a strong candidate for this role, and I am eager to discuss how I can contribute to NTT DATA's continued success.

Sincerely,
Yashwanth Raj Tirupati
